Forecast for Thursday 08 Apr 2021

Weather: Becoming cloudy during the early hours with outbreaks of rain or sleet and hill snow before daybreak. Fog likely at moderate elevation. Sleet or snow turning back to rain and drizzle during the morning, with cloud slowly lifting. Remaining largely cloudy and becoming very windy into the afternoon with the risk of some mainly light showers. A band of more persistent rain, sleet and hill snow is expected by the evening with gales or severe gales likely on summits.

Maximum wind: West-southwesterly 35-40 mph, gusting 55-60 mph.

Chance of cloud free mountain/hill tops above 600m: 90% becoming 10% overnight in precipitation and during much of the morning. Increasing to 60% by midday, then 80% into the afternoon and evening.

Visibility: Poor visibility in early rain, sleet and snow, with extensive cloud bases down to 300-400m. Becoming good or very good visibility as rain eases late morning, with cloud becoming more broken and generally lifting above summits. Some temporary patchy cloud down to 500m during the afternoon and evening.

Temperature: **Valleys:** Plus 4 degrees Celsius, increasing to plus 7 degrees Celsius by day.
At 600m: Minus 1 degrees Celsius, increasing to plus 2 degrees Celsius by day.
Freezing level: 400m, lifting above summits from mid-morning.
